

Greg Douglas

RPM Solutions

There's something reassuring about walking into your home: the richness of its surroundings, the comfort it brings at the end of a day, and the realization that the air you are breathing is safe and free of air-borne contaminants.

Greg Douglas of RPM Solutions was born and raised in Edmonton. He speaks calmly, as he describes his background in Micro Biology – and his journey into Health and Wellness; the industry that has gained more recent attention and respect than the hype inflated topics of politics and economics. Why? Because the average person has become better educated to understand the ramifications of poor quality environments!

Greg is a Certified Mold Inspector who has the training and education to understand mold and air quality and their effects on health; provide and interpret testing for hidden mold through state of the art technology that will measure levels of moisture – indicating whether or not there is a risk or promotion of mold growth; and of course, implement proper techniques for mold removal and remediation. According to Greg, *"The presence of mold may not always mean that health problems will occur, but the inhalation of the mold, fragments of the molds, or spores can certainly lead to health problems – and of course make certain health conditions such as asthma, or allergy symptoms including wheezing, chest tightness, shortness of breath and nasal congestion and eye irritation worse. Toxins derived from mycotoxins can slowly wear down the immune system and can lead to allergic or respiratory problems with symptoms that can include fatigue, headaches, and difficulty concentrating! (Mycology – means relating to mold or fungus. Mycotoxins are metabolites or by-products from the molds.)"*

RPM Solutions has certainly demystified the process of mold removal by pinpointing the major contributors and their effects. *"The seven combined factors: Bio-pollutants, particles, gases, humidity, odours, temperature, and comfort have an ongoing effect on our immunological system."* While preventative maintenance is certainly Greg's first suggestion, remedying a situation comes in as a close second. *"Mold removal is not a one time fix,"* Greg explains, *"which is why RPM Solutions offers the services and products it does!"*

Greg and his wife Carri-Ann live in The County of Strathcona, enjoying their free time on their acreage with their Rottweiler, Peanut. Greg's involvement in the community is an asset to Sherwood Park. *"Truthfully, I'm a bit shy,"* Greg explains. In spite of his shyness, he willingly serves on the Sherwood Park Chamber of Commerce board as a Director.

Greg works with Realtors, Property Managers, Public Service Sector (EMS, Fire and Police) as well as home owners. RPM Solutions' arrival is like... **a breath of fresh air!**
